**Instructions :**

Print this sheet onto thin card. Also print the divider sheets onto thin card. You will get another divider sheet with each of the next 6 issues.

**To make the tabs:** Cut out rectangular the shapes, fold in half along the dotted line, and then cut off the white corners.

Glue tabs onto the divider sheets where shown, leaving at least 1cm (3/8") sticking out.

Punch holes in your divider and put into a ring binder along with your colour coded downloaded art instruction sheets.

Don't cut out all these tabs at once, only the ones you can use right now. Punch holes in this sheet and keep the rest of the tabs safely in your folder until you need them.
